LOUIS AGYEKUM

(+233)50-026-0000 | KUMASI, ASHANTI | LOUISAGYEKUM0500@GMAIL.COM
LINKEDIN | GITHUB | WEB PORTFOLIO

Information Technology undergraduate seeking practical experience in an IT support environment. Background in customer service, SIM registration, mobile device and connectivity troubleshooting, biometric registration equipment and issue escalation. Interested in applying careful documentation, teamwork and AI-assisted project development while learning from experienced IT personnel.

EDUCATION

BSc INFORMATION TECHNOLOGY **January 2025 – October 2028**

University of Ghana • Legon, Greater Accra

GENERAL ARTS **October 2016 – May 2019**

Jachie Pramso Senior High School • Jachie, Ashanti

ACADEMIC PROJECT EXPERIENCE

KF DUO TRADE LOAN MANAGEMENT SYSTEM — CLIENT-BASED SOFTWARE ENGINEERING PROJECT

University of Ghana | DCIT208 Repository Engineering | 2026

Technologies: Node.js, Express.js, JavaScript, HTML, CSS, SQLite, Git, GitHub, GitHub Actions, AI-assisted development

- Participated in a team-based software engineering project to develop a web-based loan application and management system for KF Duo Trade, designed to replace manual application processes with a structured digital platform.
- Contributed to frontend development, including centralized CSS styling across the homepage, About and Contact pages, improving visual consistency, navigation and responsiveness across desktop and mobile devices.
- Gained practical exposure to a full-stack application featuring online loan applications, supporting document uploads, application tracking codes, status checking and an administrative dashboard for reviewing and processing applications.
- Worked with application architecture incorporating Node.js and Express.js for server-side operations and SQLite for storing applicant records, administrator accounts, sessions and audit information.
- Explored backend security and data protection mechanisms implemented in the system, including authenticated administrator access, role-based permissions, protected document retrieval, file validation, password hashing and request rate limiting.
- Used ChatGPT as a development support tool for code drafting, troubleshooting, interface improvements and understanding implementation decisions, while reviewing AI-generated suggestions against project requirements.

- Gained experience with collaborative repository engineering practices, including GitHub Issues, feature branches, pull requests, peer reviews, automated testing, continuous integration and technical documentation.

  Relevant experience demonstrated: AI-assisted software development, frontend styling, technical problem-solving, software project collaboration, GitHub workflows, database-backed applications and awareness of information security.

LOUMART — E-COMMERCE WEBSITE PROJECT

Academic Web Development Project | University of Ghana

Live Website: 209_E-commerce-Project

- Worked on an academic e-commerce website project, LouMart, aimed at demonstrating how a digital storefront can present products and support an online shopping experience.
- Gained practical experience in organizing a web development project, publishing a website through GitHub Pages and maintaining a publicly accessible project link.
- Developed familiarity with the relationship between website interfaces, source code, repository management and web deployment.
- Used the project to strengthen my understanding of how online retail businesses can present products and services through a digital platform.

  Relevant experience demonstrated: Academic web development, GitHub Pages deployment, website project organization and digital commerce concepts.

RICHLY JNR ARCHITECTURE — WEBSITE UI/UX DESIGN PROJECT

Human–Computer Interaction (HCI) Project | University of Ghana | 2026

Design Tool: Figma

Project prototype:

- Participated in an academic Human–Computer Interaction project focused on developing a website interface concept for Richly Jnr Architecture, an architectural services business.
- Worked on presenting architectural services, business information and visual content through a structured website design intended to help prospective clients understand the business.
- Applied HCI concepts to consider how visitors navigate information, interact with website elements and locate relevant business services.
- Used Figma as the project's design environment to organize website screens, visual layouts and interface concepts.
- Explored usability evaluation and design improvement through consideration of navigation clarity, content presentation, visual consistency and user expectations.
- Gained exposure to the process of translating client requirements and user needs into a website design concept before software implementation.

  Relevant experience demonstrated: UI/UX design exposure, human–computer interaction, Figma, user-centered design, requirements interpretation and website planning.

WORK & RELEVANT EXPERIENCE

SIM Registration Agent

Telecel Ghana (Formerly Vodafone Ghana) • Accra **Jan 2022 – July 2022**

- I part-took in a nationwide SIM re-registration exercise (both stages 1 and 2), managing the end-to-end capture of biometric data (fingerprints and facial recognition) and ensuring 100% data integrity.
- I educated subscribers on data privacy and security and also provided technical support to resolve registration errors and ensuring seamless transition during the transition from stage 1 to stage 2.
- With my colleagues as a team, our supervisor led on-site corporate registration drives, travelling to various governmental institutions, educational organizations and private companies to facilitate the SIM re-registration of their workforce.
- I managed mobile technical equipment and coordinated with my field supervisor to report and resolve real-time server-side latency or connectivity issues.

Mobile Freelancer

Telecel Ghana (Formerly Vodafone Ghana) • Accra **Nov. 2020 – March 2023**

- I registered and activated customers on mobile money (Vodafone Cash).
- I sold SIM cards to customers and assisted them with the activation process, which includes registering the customer's information and ensuring the SIM card is operational.
- Assisted customers with mobile money transactions, which included deposits, withdrawals, transfers, and bill payments through mobile money platforms.
- Assisted customers with inquiries, concerns, and requests related to their mobile or telecommunications services.
- I helped customers troubleshoot common issues with their mobile phones, SIM cards, or network connectivity.
- I addressed and resolved customer complaints and directed them to the appropriate channels for further assistance.

SKILLS AND DEVELOPMENT

TECHNICAL SKILLS & PRACTICAL EXPERIENCE

- AI-Assisted Software Development: Using ChatGPT to support code generation, backend development, debugging, troubleshooting and implementation of software features, with human review and verification.
- Web Development Exposure: Practical academic project experience involving HTML, CSS, JavaScript, responsive website layouts and frontend interface improvements.
- Backend Systems & Databases: Project-based exposure to Node.js, Express.js, SQLite, application data management, file uploads, authentication and role-based access controls through the KF Duo Trade Loan Management System.
- Version Control & Collaboration: Familiarity with Git and GitHub, including repository management, feature branches, Issues, pull requests, code reviews and GitHub Actions.

- Website Deployment: Experience publishing an academic e-commerce website through GitHub Pages.
- UI/UX & Human–Computer Interaction: Academic experience using Figma for website interface design, user-centered design concepts, usability evaluation and interface improvement.
- Technical Support: Practical experience assisting customers with SIM registration, mobile device issues, network connectivity problems and registration equipment.

PROFESSIONAL & TRANSFERABLE SKILLS

- Customer service, communication and active listening.
- Technical problem-solving and issue escalation.
- Accurate data capture and handling of confidential information.
- Teamwork, collaboration and adaptability.
- Attention to detail, time management and procedural compliance.
- Willingness to learn new technologies and apply feedback.

PROFESSIONAL DEVELOPMENT

- Cisco IT Support Specialist Career Pathway — Cisco Networking Academy: In progress. Studying IT support fundamentals, troubleshooting, networking, operating systems, system administration and cybersecurity concepts.
- Practical Software Development: Building experience through academic projects involving AI-assisted development, database-backed applications, website deployment and collaborative software engineering.
- UI/UX Development: Strengthening knowledge of human–computer interaction, usability principles and interface design through academic Figma projects.
